To: Wildfire Safety Advisory Board
Subject: Comment re. WSAB recommendations

TURN appreciates the different recommendations of the WSAB. We also strongly agree with the comments that the "scope" of the various proposed programs, particularly covered conductor, should not be endorsed, because the IOUs did not use their own risk assessment models to prioritize circuits and circuit segments for covered conductor installation. It may be more appropriate to deploy CC on a more limited basis on those circuits that represent highest risk.
