

Trenchless Excavation Workshop

August 27, 2020

General Questions for Discussion

1. What hazards or risks do you pay attention to when using trenchless excavation methods?
2. What communication or information sharing between project owners, engineers, operators, excavators and other parties takes place when planning and conducting trenchless excavation projects?
3. How do you prepare a trenchless excavation jobsite around existing underground facilities?
4. How do you take care to avoid nearby subsurface installations while performing trenchless excavation?
